

Best Practice for Bid Management Success

◆ Building a Powerful Bid Library

Comprehensive, accurate up to date information is required to compile quality, high scoring tender responses.

But many businesses struggle to provide a centralised content resource. This causes delays in compiling bids and pressure to reuse previous low scoring or inaccurate tender responses.

Tender Content Sourcing Challenges

- 01** Finding the right person for the right information
- 02** Securing that information in a timely manner
- 03** Being confident in its accuracy and quality

9 Steps to Building a Powerful Bid Library

A comprehensive, well-managed Bid Library, easily accessible by all stakeholders, is a critical element of Bid Management best practices.

This can be achieved by the following actions:
